## Prepare for the APICS CTSC exam with expert guidance

The APICS Certified in Transformation for Supply Chain (CTSC) covers the ASCM standards, processes, models and frameworks, as well as industry best practices, tools, and technologies commonly applied to manage end-to-end supply chain transformation.

The CTSC body of knowledge leverages components of ASCM's globally recognized standards, including SCOR DS, Enterprise Standards for Sustainability and the Digital Capabilities Model (DCM) to:

- Develop, deploy and manage change for a successful supply chain transformation
- Identify risks and opportunities, and select the appropriate philosophies, frameworks, models, and approaches to effect transformation
- Apply systems thinking to develop, analyze, verify and validate concept alternatives for transformation
- Manage and align processes and capabilities with strategic transformation goals
- Manage skills, roles, responsibilities and infrastructure for a supply chain transformation
- Identify tools and technologies to enable effective supply chain transformation
- Identify and implement strategies for reinforcing and replicating improvements

## INSTRUCTOR-LED COURSES

### Expert Instructor-led classes

Join a course with an experienced instructor

Our certification preparation courses utilize the APICS CTSC Learning System that an instructor will guide you through.

#### Benefits of an instructor-led course

- Learn from an experienced instructor who provides expertise, insights, and one-on-one guidance
- Network, share experiences, and discuss topics with a diverse group of professionals
- Stay on track to earn your certification with a structured learning experience

Upon successful completion of the CTSC program, learners will have the necessary skills to develop an effective supply chain strategy and enable an organizational transformation through case studies from globally recognized organizations.
