

TOM PETIT

Co-Founder and CTO
Didero

[MEET TOM IN PERSON](#)

BIOGRAPHY

Tom is the Co-Founder and CTO of Didero (Microsoft backed Stanford AI company). A 20+ year AI expert, Tom leads the technical development of Didero's autonomous procurement agents. He architects the proprietary "Reasoning Engines" that allow agents to parse unstructured supplier data and execute workflows securely. Tom also oversees the company's enterprise-grade security infrastructure, ensuring that agentic AI deployments meet the rigorous compliance and integration standards of global IT organizations. He holds degrees from Stanford and Cambridge, and previously founded an AI company backed by Google and KKR that raised \$250M+.

AI 101 FOR SUPPLY CHAIN MANAGEMENT

Organizational silos are a roadblock to operational excellence. 3 Nodes of Knowledge (3NoK) is a framework that recognizes the interdependencies among people, products, technology, and information across an organization, and breaks down silos while improving process throughput and cross-functional collaboration.
